Heat Pump Price List
2023 / 2024

Panasonic environmental vision 2050

To achieve “a better life” and “a sustainable global environment,” Panasonic will work towards creation and more efficient utilisation of energy which exceeds the amount of energy used, aiming for a society with clean energy and a more comfortable lifestyle.

Energy used < Energy created

One initiative in the Panasonic environmental vision 2050 is offering products with greater energy efficiency. In 2018, we celebrated the 60th anniversary of our Heating & Cooling Solutions business. Our expertise gained over the years has helped us launch a range of products that contribute to a more carbon-free society.

Current status of energy used and energy created

Energy used by Panasonic business activities and products.

10 Energy used

Clean energy created and / or made available by Panasonic products, etc.

1 Energy created

Working to realise environmental vision 2050

Vitalise the future with air.

These are times of exceptional challenge. If the world is to move forward confidently, it must overcome the serious threats of the new global pandemics and the degrading of the environment. It must find ways large and small to reduce the stresses that affect people's health and the stability of their communities.

Bringing nature's balance indoors.

nanoe™ X, technology with the benefits of hydroxyl radicals. In today's health-conscious world, we care about taking exercise, we care about what we eat and what we touch, we also care about what we breathe – and technology exists to bring good outdoor air, indoors.

100% Panasonic, the DNA of Japanese craftsmanship

Applying advanced technologies that truly make life better, we live by an unparalleled commitment to product quality. Panasonic is building on the Japanese tradition of uncompromising quality control worldwide, developing and manufacturing fine products and delivering them to customers everywhere.

A globally trusted air conditioning brand.

Panasonic – leading the way in Heating and Cooling. With more than 50 years of experience, selling to more than 120 countries around the world, Panasonic is one of the leaders in the heating and cooling sector. With a diverse network of production and R&D facilities, Panasonic delivers innovative products incorporating cutting-edge technologies that set the standard for air conditioners worldwide.

PRO Club. The professional website of Panasonic

Panasonic has an impressive range of support services for designers, specifiers, engineers and distributors working in the heating and cooling markets.

Panasonic PRO Club (www.panasonicproclub.com) is the online tool which makes your life easier! You just have to register and a lot of functionalities are freely available to you, where ever you are, from your computer or smartphone!

- Print catalogues with your logo and contact details
- Access to the extensive library of professional design, selection and calculation tools (Aquarea Designer, VRF software, chiller selector, etc.)
- Get documents of conformity and all other documents you may need
- Download all the service manuals, end user manuals and installation manuals
- Download energy labels in PDF format using the energy label generators
- Download Revit and CAD files and specification texts
- Know what to do with error codes (error code search by error code or unit ref.)
- PRO Academy: register for training
- Download product images in high resolutions, advertisements, deco guidelines
- Get to know special offers and promotions
- Find out about the latest news first

Easy download Panasonic service documentation and brochures

Customise leaflets with your logo and contact details. Save and print the PDF

Energy label generator. Download Energy labels of any device in PDF format

Error Code on your smartphone and your PC: Search by error code or model reference. Online version + downloadable version for offline use

Panasonic PRO Club is fully compatible with tablet computer and smartphone.

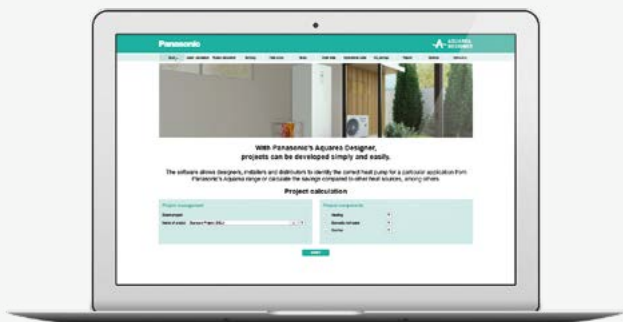

Visit www.panasonicproclub.com or connect simply with your smartphone to the PRO Club using this QR.

Panasonic provides bespoke software and tools helping system designers, installers and dealers to very quickly select, design and size systems or create wiring or hydraulic diagrams at the push of a button.

Aquarea Designer - online tool

With Panasonic's online tool, projects can be developed simply and easily. The newly developed tool is optimised to help HVAC professionals easily identify the most appropriate Aquarea air to water heat pump for a particular application.

Domestic AirCon Quick Selector

This user-friendly online tool for our domestic range allows to choose the best split or multi-split system for each project needs and get the specifications of that particular application.

New commercial AC design software

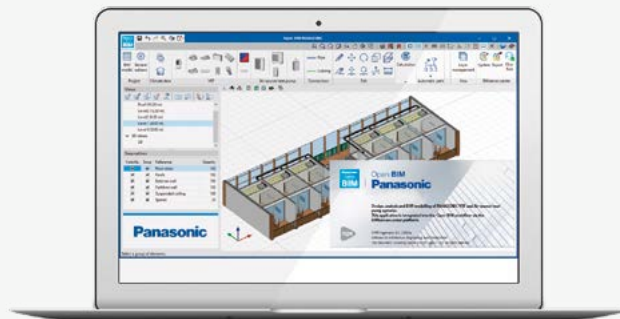

The commercial AC design software will be rebuilt with an improved user experience. The new software runs in the cloud and is always up to date with the latest products. An intuitive interface supports the most complicated designs, allows online sharing and project collaboration with multilingual support.

* Available from Spring 2023.

Open BIM

Design, analysis and BIM modeling of Panasonic VRF and Air to Water heat pump systems. Generates documents, 3D model, schematics and drawings. This application is integrated into the Open BIM workflow via the BIMserver.center platform.

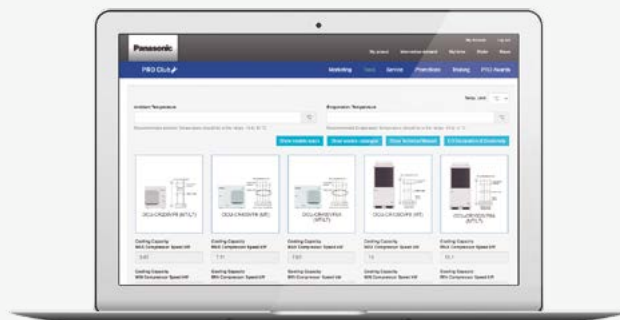

Chiller configurator

This online software solution offers a complete tool to allow the user to accurately calculate the performance at specified conditions, select and configure our range of commercial chillers, heat pumps and fan coils. It also provides a comprehensive report to share with customers and clients alike.

Refrigeration designer

This simple design tool supports engineers, installers, and technicians to make a quick calculation for commercial refrigeration systems.

AQUAREA

Welcome to Aquarea air to water heat pumps

From 3 kW to 16 kW, Panasonic's Aquarea air to water heat pumps range is one of the widest on the market, offering solutions for most properties, whatever their size and heating and cooling demands. Suitable for new build and refurbishment projects, the solutions are cost-effective with minimised environmental impact.

New Aquarea L Generation, with natural refrigerant R290.

- Ideal for retrofit applications
- Hydro connection between the indoor and outdoor unit
- Water outlet temperatures of up to 75 °C down to -10 °C
- Domestic hot water up to 65 °C without heater
- New indoor unit design plus a new outdoor unit in anthracite grey
- Wi-Fi adapter included

New Aquarea K Generation.

- Ideal solution for new build applications
- Water outlet temperatures of up to 60 °C down to -10 °C
- Available in High Performance and T-CAP ranges
- New indoor unit design plus a renewed outdoor unit in anthracite grey
- Seamless connectivity integration
- Remote controller designed in harmony with the whole system

T-CAP Monobloc in R32.

Offering the maximum comfort and flexibility, the Aquarea T-CAP Monobloc J Generation in R32 can maintain the heat pump output capacity until -20 °C outdoor temperature or reach up to 65 °C water outlet.

Aquarea Smart and Service Cloud.

A powerful and intuitive service for remotely controlling the full range of heating and hot water functions, including monitoring energy consumption. Aquarea Service Cloud allows installers to take care of their customers' heating systems remotely.

Aquarea Heat Pump line-up

All in One System.

The system, consisting of separate indoor and outdoor units, connects to the heating and/or hot water system. The indoor unit includes a stainless steel DHW tank (185 L).

Bi-bloc System.

The system, consisting of separate indoor and outdoor units, connects to the heating and/or hot water system (tank not included).

Monobloc System.

This only has an outdoor unit. The installation doesn't require a refrigerated connection and is only connected to the heating and/or hot water (tank not included).

Aquarea Smart Cloud for the users.

The most advanced heating control for today and for the future.

Aquarea can be connected to the Cloud*, enabling a powerful and intuitive service for remotely controlling the full range of heating and hot water functions, including monitoring energy consumption.

* Requires Wi-Fi adapter CZ-TAW1B.

Aquarea Service Cloud for installers.

The Aquarea Service Cloud allows installers to take care of their customers' heating systems remotely.

It saves time and money and shortens the response time, thus increasing the customers' satisfaction.

Panasonic Aquarea offers you solutions, helping to make the home more efficient and the installation cheaper and easier.

Aquarea High Performance

For new installations and low consumption homes.

Outstanding efficiency and energy savings with minimised CO₂ emissions and minimum space. Improved performance with COPs up to 5.33 for J and K Generation 3 kW.

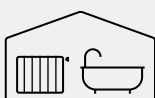

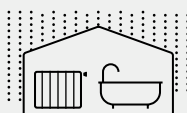

Now also available with natural refrigerant R290.

Aquarea T-CAP

For extremely low temperatures, refurbishment and innovation.

Ideal to ensure that the heating capacity is maintained even at very low temperatures. This line-up is able to maintain the heat pump output capacity until -20 °C¹⁾ outdoor temperature without the help of an electrical booster heater.

1) At 35 °C flow temperature.

Aquarea components

Panasonic Aquarea A2W heat pumps come with a high level of components as standard that is required for your system to operate, no need to build a unit each time you order, this provides a true price of the unit rather than having to build it each time to find out, no hidden costs.

For a full list items included with each unit along with performance data, see the list below:

Aquarea T-CAP.

For retrofit and new builds, Aquarea T-CAP is the ideal solution for those installations where the output capacity is demanding. The entire Aquarea T-CAP line-up is excellent for replacing gas or oil boilers and for connecting to new underfloor heating, radiators or fan coil units. Aquarea T-CAP can maintain the heat pump output capacity until $-20\text{ }^{\circ}\text{C}$ ¹⁾ outdoor temperature without the help of an electrical booster heater, offering high heating capacity even at low ambient temperatures.

1) At $35\text{ }^{\circ}\text{C}$ flow temperature.

Aquarea T-CAP Mono-bloc J Generation R32.

R32 Refrigerant: A 'small' change that changes everything.

With Mono-bloc, the refrigerant circuit is sealed inside the outdoor unit, so there is no need to worry about the amount of refrigerant per room.

$65\text{ }^{\circ}\text{C}$ ¹⁾ water temperature possible.

By optimising the system and the refrigerant cycle, the unit can work under higher pressure and realise a water temperature of $65\text{ }^{\circ}\text{C}$.

1) In case of ΔT setting with remote controller is $15\text{ }^{\circ}\text{C}$ and outdoor ambient temperature is $5\text{ to }20\text{ }^{\circ}\text{C}$, $65\text{ }^{\circ}\text{C}$ hot water temperature is possible. Even with the T-CAP series, capacity will drop when water temperature reaches $65\text{ }^{\circ}\text{C}$.

How Aquarea T-CAP maintains performance even at $-20\text{ }^{\circ}\text{C}$ outdoors

A patent has been obtained for technology that can maintain heating capacity even in low outdoor temperatures through optimal control that comes from incorporating dual-piped heat exchanger into the refrigeration cycle.

Dual-piped heat exchanger.
Low pressure and low-temperature refrigerant in the inner pipe.

Aquarea T-CAP

NEW Aquarea T-CAP Refrigerant Split Bi-bloc K Generation Single phase / Three phase. Heating and Cooling - R32

Wi-Fi adapter included.

Aquarea Designer - online tool.

With Panasonic's online tool, projects can be developed simply and easily. The newly developed tool is optimised to help professionals easily identify the most appropriate Aquarea air to water heat pump for a particular application.

Hydraulic scheme generator.

This tool allows costumers to select the scheme between more than 110 different type according to their installation requirements in a simple way. It possible to download hydraulic and electric part in pdf and in cad file. Moreover it is available a list, one for each scheme type, with the Panasonic codes and third party codes that the costumers need to realise the installation in a proper way.

AR Heat Pump Viewer.

This tool allows you to see how a Panasonic Aquarea Heat Pump looks in a home, utilising augmented reality.

Heating demand calculator.

This software can quickly and easily determine the heating requirements for the rooms in a project. The Heating demand calculator will help determine approximately how much power is needed to heat each room individually. The result in kilowatts will help you choose the heat pump best suited to your needs.

Fan coils

Smart meet Wiser

Introducing Wiser, the most comprehensive multi-zone heating system from Drayton.

Panasonic has partnered with Drayton by Schneider Electric to offer its Wiser room-by-room heating control system. Seamlessly integrating with your Panasonic Aquarea Air Source Heat Pumps and the Aquarea Smart Cloud and Service Cloud apps, the Wiser system provides an additional element of energy control and simple home automation.

What makes Wiser wiser?

Simplicity.

Standard wallplate, wireless devices.

Flexibility.

Up to 3 channels, 16 rooms, 63 devices.

Multi-zoning.

Add radiator thermostats, underfloor heating controller or electrical heat switch as required.

App control.

Simple app with boost and away mode.

Eco mode.

Combines weather compensation and optimum stop for maximum savings.

Comfort mode.

Uses optimum start for maximum comfort.

Heat report and insights.

View and compare temperatures across single or multiple rooms.

Geofencing.

Enhanced control with geofencing through IFTTT.

OpenTherm®.

Digital boiler interface enabling more efficient control.

This new partnership offers you the option to combine your new Panasonic's Aquarea air source heat pumps with Wiser smart controls to provide you with room-by-room heating control by fitting Wiser with your Aquarea system. The combination of smart controls will help make your home as energy efficient as possible by bringing different electrical devices under the control of one app, helping you to lower their bills and reduce your carbon footprint. Wiser can be set up in the usual way with the Panasonic Aquarea heat pump, and will enable you to monitor and easily adjust the heating in each room and via any web-enabled device, including Android and iOS applications and Internet browsers.

Benefits of Wiser

Wiser combines smart features with simplicity to bring you the most complete home heating solution. Wiser makes home personalisation affordable by allowing you to start with a smart room thermostat and build a full multi-zone solution over time by adding radiator thermostats and incorporating electrical and/or underfloor heating.

- Smart heating and hot water control
- Easy zoning with radiator thermostats
- Control wet underfloor heating zones
- Incorporate electrical heating
- Quick and easy installation
- Schedule electrical appliances by adding Wiser Plugs

The Wiser Home app:

The app has been designed to make your life simple. Step-by-step commissioning instructions guide you through the whole process in just a few minutes.

The user interface has been designed to be intuitive so your customer will have no problem taking control of their heating. Set up can be done within seconds and programming couldn't be easier. Boost, set point and room selections can all be accessed from the home screen.

Download in the App Store – search Wiser Home.

Scan the QR for more information and to purchase your Wiser home kit.

Features

Away mode.

Activate when away from home to reduce all set points and save 24% of energy.

Schedules.

Set time and temperature schedules for every device to ensure full multi-zoning efficiency.

Boost/cancel all.

Boost all devices in the system or cancel all overrides - enables complete system testing with the tap of a button.

Eco mode.

Combines weather compensation & optimum stop for maximum savings.

Insights and heat report.

Track the system performance to adapt heating schedules and settings to save energy.

Moments.

Group multiple devices to be activated together to create a mood or 'moment'.

Wiser accessories*

	Wiser thermostat kit 1. One channel thermostat pack ideal for heat pumps.	WT714R9K0902
	Wiser thermostat kit 3. Three channel thermostat pack ideal for properties with two heating zones.	WT734R9K0902
	Wiser multi-zone kit 1. One channel thermostat system with two radiator thermostats to start zoning your system.	WV714R9K0902
	Wiser radiator thermostat. Add additional single radiator thermostats to any of the Wiser kits to create more zones and benefit from maximum comfort and energy saving.	WV704R0A0902

	Wiser room thermostat. Additional room thermostat - add to rooms with radiator thermostats as a convenient way to view and change the room temperature. Works with all Wiser kits.	WN704R0S0902
	Wiser plug. Set schedules for home appliances from the Wiser heat app, this smart plug can be controlled from your phone or by using voice activation with the google assistant and amazon alexa. The built in range extender also enables connectivity to devices sited further away from the heat hub.	WB704H1A0902
	Wiser electrical heat switch. Wiser electrical heat switch + Wiser room thermostat will control any of the following applications: plinth heaters, electric radiators, infrared panels, electrical UFH.	WE714U1A0902
	Wiser under floor heating controller. The Wiser underfloor heating controller enables complete control over the entire heating system, no matter what the application, via the Wiser home app.	WF762F1A0902

* Wiser accessories, are compatible with Panasonic units, but are product from Drayton Controls and are not available from Panasonic directly. Locally source, Panasonic is not selling this devices.

Panasonic service

Our Panasonic Service teams are committed to ensuring your peace of mind. Best service is our aim.

Panasonic provides a team of highly trained technicians and engineers to deliver professional and responsive services that meet the highest levels of quality and safety while being efficient and cost effective.

To find out more about Panasonic Heating & Cooling Solutions, please visit **www.panasonic.co.uk/aircon**.

Maintenance.

To meet the requirements of the standard warranty, the product must be maintained and serviced annually by a suitably trained and qualified engineer. This way we can extend the lifetime of the product.

Repair.

Panasonic offers a wide range of service agreements, like Panasonic Service+ for a maximized product lifetime. Leave the care of your Panasonic products to the experts. In the unlikely event that something goes wrong, trust one of our qualified and Panasonic trained experts to get things back on track.

Warranty.

In accordance with the regulations, Panasonic guarantees its products against hidden defects. Moreover, Panasonic grants to the professional purchaser a commercial warranty, specific to the product families, subject to compliance of all the rules of installation and use of its products.

Panasonic Heating & Cooling Solutions customer service

Panasonic enables different channels for end users or professionals to get in touch with us:

Use our European website **www.panasonic.eu** for contacting us.

Panasonic has implemented a contact page on the Panasonic Heating & Cooling Solutions website for potential or existing Panasonic customers.

Another option is to contact the highly experienced teams at the Panasonic customer service center, who are more than qualified to support Panasonic clients in 13 different languages across Europe.

Our service center for United Kingdom end customers:
